### **Mileage performance of Michelin X WORKS range tyres**

Company DAL s.r.o. offers services in freight transport, construction activity, gravel production, dolomitic gravel production, ground works, demolition, recycling of the construction materials, soil stabilisation. During 20 years of activity DAL company became one of the main providers of production and transport of materials needed for construction works in region of Žilina. We have at disposal 70 rigid trucks of the brand Volvo, Mercedes Benz, Renault and Tatra.

Transport activity concerns mainly transport of construction materials from our quarry where we produce gravel, dolomitic gravel to construction sites across the region. We supply building, roads, motorways, industrial parks construction companies. Vehicles drive daily in difficult conditions loading gravel in quarry and unloading at construction sites. Average mileage of one turn is 30 km. By our fleet we are able to do 700 turns daily. Yearly average mileage is around 85 000 km/1 vehicle.

Thanks to Michelin X WORKS range tyres, we achieve even in our difficult conditions mileage performance with configuration 8x4, 8x6 and tyre dimension 315/80R22.5 in average 100 000 km. Our experience of the mileage performance with other Michelins premium brand competitor tyres in the dimension 315/80R22.5 is in average up to 30 000 km.

Thanks to high quality of the casing of Michelin X WORKS we were able to lower downtime of the vehicles for the reason of lower amount of mechanical damages of the tyres. Michelin X WORKS damage warranty is also helping us to lower costs caused by an accidental damage leading to scrap of the tyre.

In overall we are confident to say that now in the time of cost cutting, are Michelin X WORKS tyres for us, and our type of the transport the best and therefore the cheapest solution.
